Introduction

Introducing *Got it! 2nd edition*

Methodology

Got it! 2nd edition is a four-level American English course written specifically for secondary school students, with particular emphasis on meaningful communication and skills development. It covers levels A1 through B2 in the Common European Framework for Reference (CEFR).

The second edition has brand new content and builds on the strengths of the first edition, following thorough research into the needs of teachers and students.

Key features of the methodology are:

Hands-on language presentation Students immediately interact with the dialogue or text that opens each unit, check their understanding of meaning and context, and are given the chance to try out new structures;

Guided discovery Students explore the meaning and usage of new language before they move on to more formal presentation and practice;

Communicative practice Dialogue work and personalization are emphasized at each level, and pairwork activities and games are included throughout;

Cultural awareness A focus on the U.S. and other English-speaking countries is placed within the context of the wider world;

Skills development In every unit, students apply and extend what they have learned, through targeted skills lessons designed to build their competence in each individual skill;

Self-assessment Students regularly review and measure their progress against the Common European Framework of Reference;

Learning across the curriculum Interdisciplinary reading and project pages link the topics and language content of the main units to other areas of the school curriculum;

Values The topics in *Got it! 2nd edition* have been carefully chosen to stimulate reflection on a broad range of issues related to citizenship and the development of socially responsible values. These are highlighted in the teaching notes for each unit.

Using the Student Book

Welcome unit

The Welcome unit offers six pages of vocabulary and grammar practice, covering language students have seen in the previous level. In the Starter level, students are given a brief overview of basic language they may have seen at primary level, before beginning the main syllabus in unit 1.

Main units

Each main unit is divided as follows:

Presentation and Language focus 2 pages

Vocabulary 1 page

Grammar 1 page

Communication 1 page

Grammar 1 page

Skills 2 pages

Presentation

The Presentation text on the left-hand page exposes students to the theme, grammar, vocabulary, and functions of the unit. The Language focus exercises on the right-hand page allow students to interact with the dialogue in more detail, encouraging them to explore, use, and personalize new language before it is formally presented and practiced on the Vocabulary and Grammar pages.

In the Starter level and Level 1, the text is a dialogue presented in a photostory format. The photostories reflect the aspirations of the students, using familiar contexts to motivate and engage them. Each unit focuses on a different episode in the lives of the central characters.

In the Starter level, the story takes place in a school. Jacob meets a new girl, Lucia. Lucia joins the school choir, and Jacob joins the choir so he can get to know her. Jacob's friends are mad about this because choir practice makes him late for soccer practice. Max tells Jacob to choose between choir and soccer. Jacob is sad and chooses choir, which means he will

miss the big soccer game. Lucia persuades Jacob at the last minute to play in the game. Jacob's friends go to watch the choir perform in a show, and realise that choir is actually cool.

In Level 1, we follow a story about two bands (Supernova and The Misfitz) competing against each other in a Battle of the Bands competition. Zac, the lead singer of Supernova, is behaving arrogantly and doesn't care about band practice. The other members of the band become frustrated with him. Zac decides to leave Supernova and join The Misfitz. This leaves Supernova without a singer at the last minute. Rosie, a member of Supernova, decides to sing at the contest, transforms her image, and amazes everybody! Supernova wins the contest. Zac is mad, but the Supernova band members are very happy.

In Levels 2 and 3, the emphasis is on texts dealing with individual topics of a more grown-up nature, in recognition of the fact that students, along with their interests and tastes, mature very quickly during the teenage years. A variety of formats and genres is used, including dialogues, magazine articles, and web pages.

Following on from the presentation text, students complete a series of questions to check basic comprehension. The **Check it out!** feature draws students' attention to useful colloquial expressions in the dialogue in Starter level and Level 1, while in Levels 2 and 3 it helps students extend their vocabulary.

Language focus

The exercises in the Language focus section familiarize students with the language of the unit, without requiring them to manipulate it. In Starter and Level 1, students focus on the target language in relation to specific scenes and sections of dialogue from the photostory; in Levels 2 and 3, students find phrases and structures in the presentation text, and use them to complete sentences or captions about the text.

Finally, **Focus on you** and **Pairwork** activities give students the chance to communicate with the new language in a personalized context, following carefully controlled models.

Vocabulary

This page presents and practices a set of vocabulary items associated with the unit topic and previewed in the presentation lesson. **Look!** boxes contain useful tips and draw attention to potential problems and errors. These include spelling rules, exceptions or irregular forms, collocations, and notes about English usage.

Students once again have the opportunity for guided speaking practice with a **Pairwork** activity at the end of the lesson.

At the foot of the Vocabulary page, students are directed to the Extra practice online and the Workbook, where there is further practice of the unit vocabulary.

Grammar

Underlying the methodology of *Got it!* is the conviction that students understand and remember rules better if they work them out for themselves. As a result, a guided discovery approach to teaching grammar is adopted throughout the series.

Each unit has two Grammar lessons. A grammar chart models the form of the key structures, using examples taken from the presentation text that opens the unit.

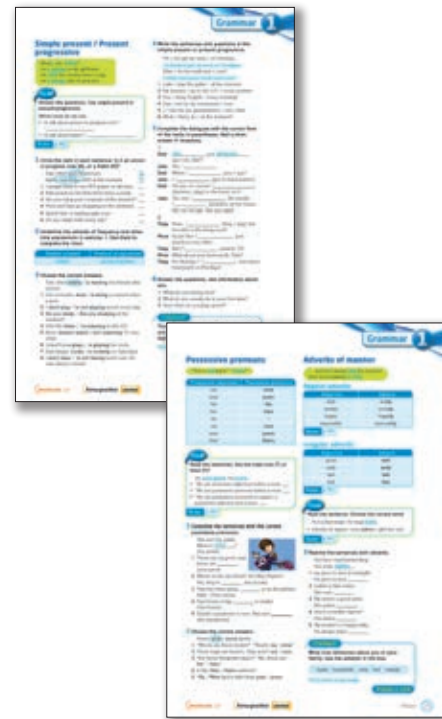

Having already experimented with the new structures earlier in the unit, students are encouraged to reflect on correct usage in more detail as they complete the **Think!** activity.

A cross-reference to **Rules** then directs the students to a grammar reference page in the corresponding Workbook unit, where detailed explanations and examples are given.

The activities on the page provide thorough and detailed practice of both form and usage, moving from carefully controlled exercises to more demanding production.

Each Grammar page has an optional **Finished?** activity. These are designed as a fun way of providing extension work for fast finishers. Fast finishers can then move on to a puzzle at the back of the book. The puzzle practices the language presented in the unit.

At the end of each Grammar page, students are directed to the Extra practice online and the Workbook, where there is further practice.

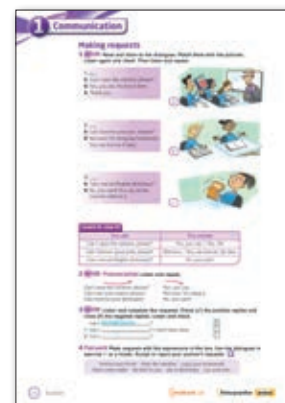

Communication

One page in every unit focuses on everyday English. Conversational language is presented in the form of a dialogue which reviews the vocabulary and grammar from the previous lessons.

The **Learn it, use it!** feature summarizes the target language in the dialogue, while some pages feature a **Pronunciation** activity that draws students' attention to a specific sound or a relevant aspect of intonation. The students then listen to this language in different contexts before practicing it themselves in the **Pairwork** activity.

At the end of each Communication page, students are directed to the Extra practice online and the Workbook, where there is further practice.

Skills

The last two pages of the unit contain targeted skills work designed to equip students with the necessary strategies to build confidence and competence in each individual skill.

Skills lessons also provide a way of consolidating and recycling the language students have studied throughout the unit, while exploring different aspects of the unit topic.

Reading texts deal with the main topic of the unit in a factual way using real-life contexts. Comprehension exercises typically start with a skimming or scanning activity, followed by more detailed questions that gradually increase in difficulty as the series progresses.

Listening activities extend the topic of the text. A variety of activity formats is used to help students develop well-rounded listening comprehension skills.

The **Speaking** and **Writing** sections give students the opportunity to respond to the unit topic with their own ideas. To help students organize their ideas, both sections usually begin with a written preparation stage. The aim is to strike a

balance between giving clear, guided models on the page on the one hand, and allowing students freedom to express themselves and experiment with newly-acquired vocabulary and structures on the other.

Review units

After every two main units, there is a four-page Review unit comprising:

Grammar and Vocabulary Review 1 page

Extra communication 1 page

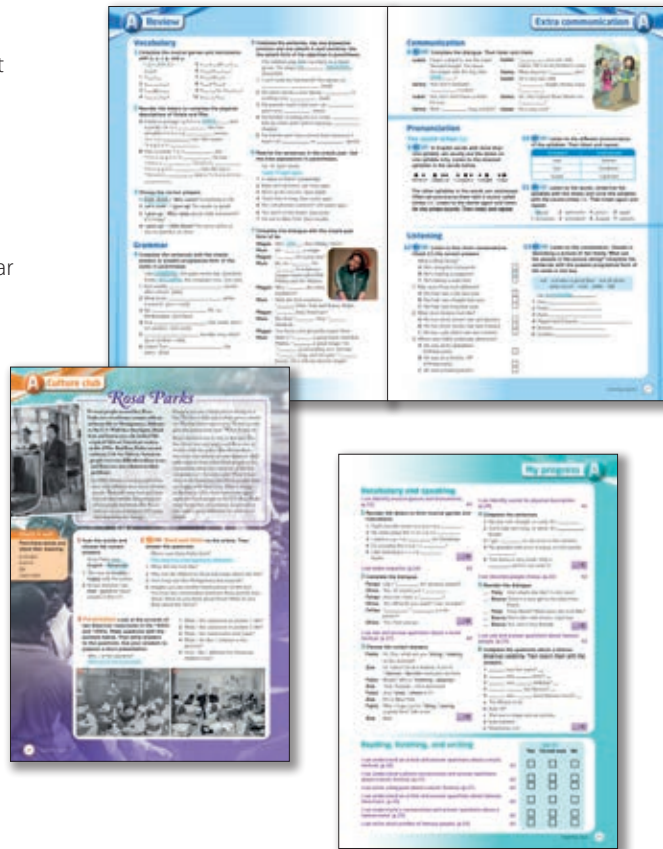

Culture club reading 1 page

My progress 1 page

The first page of each Review unit covers the main grammar and vocabulary points from the previous two units. The second page of the Review unit consists of **Extra communication** activities. This comprises practice from the Communication sections of the previous two units, some relevant Pronunciation work, and an additional listening comprehension.

Most teenagers are curious to know what life is like for their peers in other parts of the world. **Culture club** reading lessons give a factual account of different aspects of the English-speaking world from a young person's perspective. The **Presentation** section at the end of the lesson invites a personal response from students in the form of a presentation.

The **My progress** page is a self-assessment page correlated to the Common European Framework of Reference. It is very motivating for students to reflect on their progress, and this type of activity is also very helpful in encouraging students to take responsibility for their own learning.

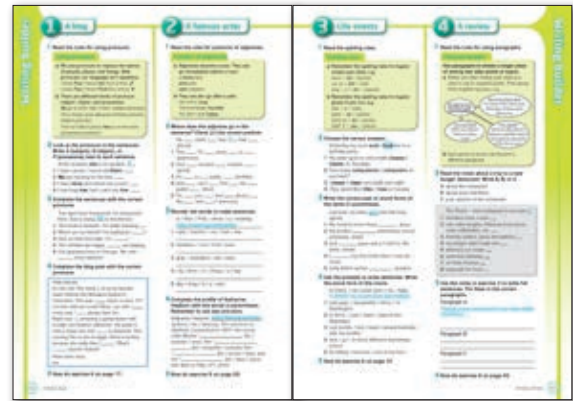

Remember

After Unit 4, there is a two-page review covering the main grammar and vocabulary points from the first half of the book. In the split edition of *Got it! 2nd edition*, the Remember unit opens the second volume at each level.

Writing builder

There are four Writing builder pages in the Student Book, providing extra writing practice for every main unit. The Writing builder gives an opportunity to expand and develop the skills acquired in the writing section in the unit. In each section, a useful skill or language point is presented and then practiced. Students work with a model text and build up to producing their own composition, with the support of a Writing guide.

Curriculum extra

There are four cross-curricular reading and project lessons in the Student Book, providing two pages of material for each block of two units. The Curriculum extra lessons link to the themes of the corresponding Student Book units, as well as to subjects that students typically study in their own language, such as geography, science, math, art, and history.

Each of the lessons concludes with a project that synthesizes the language focus and the content of the cross-curricular theme and gives students the opportunity to develop their creativity. The projects can be done in class or assigned for homework. Depending on time available and the needs of the students, the projects can be done in groups, pairs, or individually.

Puzzles

There are four Puzzle pages in the Student Book, providing two puzzles for every main unit. These puzzles practice the key vocabulary and grammar that is presented in the unit. Students are directed toward the puzzles when they have completed all the activities on the grammar pages. The puzzles are useful for mixed-ability classes as they make a good activity for fast finishers, as well as being motivating for weaker students. Alternatively, they can be used with the whole class as a fun warm-up or end-of-lesson activity.

Word list

The Student Book includes a Word list clearly organized by unit and by part of speech. It contains all sets of new vocabulary items from each of the eight units in addition to other incidental vocabulary items that may be new to students.

All words are accompanied by their pronunciation clearly presented in phonetics, and the Word list is a useful tool for student self-study.

Workbook

The Workbook section contains eight six-page units of extra practice of the language and skills taught in the Student Book. The Workbook exercises can be completed in class or for homework.

The first two pages of each Workbook unit summarize the grammar structures introduced in the corresponding Student Book unit with comprehensive charts and detailed grammar notes. They also contain a Word list of all the new vocabulary from that unit.

The following two pages provide extra vocabulary and grammar practice.

The last two pages provide additional practice to accompany the Student Book Communication lesson, and further reading and writing practice.

Online Workbook

All students have access to the Online Workbook, via a code supplied on a card in the Student Book and Workbook.

The Online Workbook includes activities from the print Workbook, with additional **Extra practice** in vocabulary, grammar, and communication. There are extra activities for every unit of the Student Book, as well as a **Picture dictionary**, extra **Review activities**, and regular interactive **Progress quizzes**.

Most of the Online Workbook and Extra Practice activities are automatically graded, and the scores are visible in the **Gradebook**. You can assign work to your students and monitor their progress.

You can access the Online Workbook Learning Management System via a code supplied on a card in the Teacher's Book. The Teacher's resources are also supplied online in the Teacher's resources section of the Online Workbook.

There are many benefits to using these online materials. Students often feel more motivated when working online, and the automatic grading means that valuable time in class does not have to be spent correcting homework.

The Online Workbook and Extra practice activities are suitable for use in a language lab with Internet connection if there is one computer per student, as well as at home.

See page xv for more information and support with getting started.

The Online Workbook includes most of the exercises from the Workbook in an interactive format. Students and teachers can use all the content easily on desktop, laptop, or tablet computers.

Each unit of the Online Workbook contains a **Picture dictionary** with audio which students can listen to in order to review the vocabulary set from the corresponding Student Book unit.

The Online Workbook features automatic scoring of most exercises.

Writing exercises are provided in a PDF format which students can send electronically to their teachers for grading.

The Gradebook allows teachers to monitor students' progress in the Online Workbook and send feedback on their work. Teachers can choose to filter the data in a variety of different ways, and they also have the ability to generate reports.

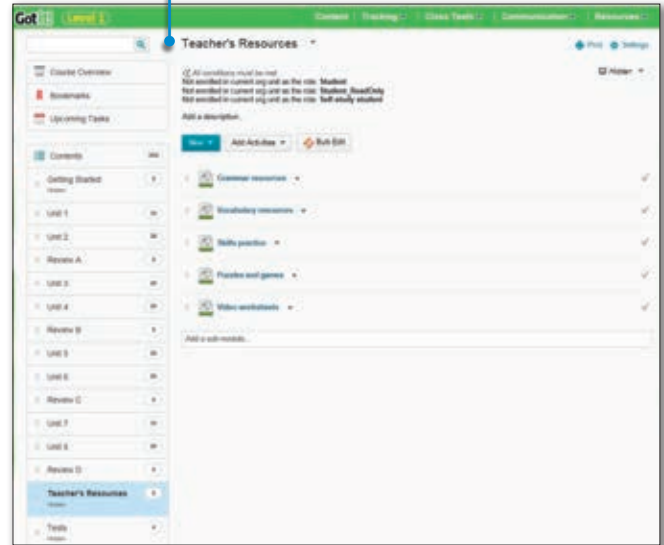

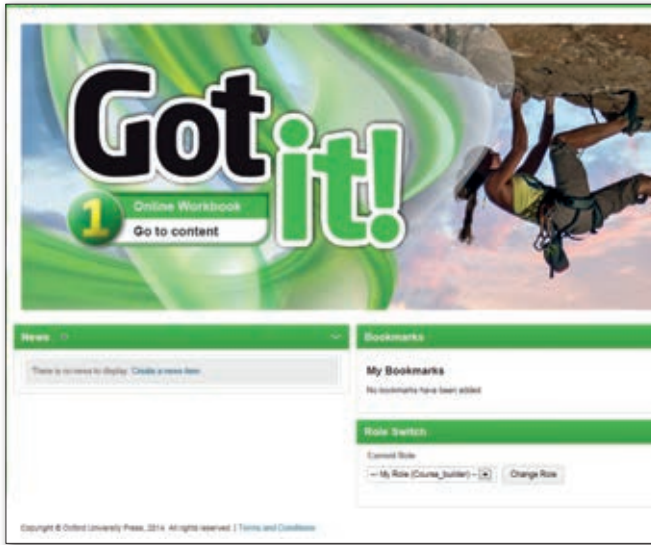

Online Teacher's resources

There is a large amount of extra resource material included online in the Teacher's resources section of the Online Workbook. These can be accessed via a code supplied on a card in the Teacher's Book.

The Teacher's resources provide support material for consolidation, extension, mixed-ability classes, and assessment.

All the printable Teacher's resources and tests are in one place and are easily accessible from the Teacher's view of the Online Workbook.

The Teacher's view of the Online workbook can only be accessed by teachers who have registered and been validated. Students cannot see or access the teacher's materials.

Printable worksheets

Grammar and vocabulary

Grammar help and **Vocabulary help** worksheets for each unit provide additional practice of the Student Book material at a basic level, and are ideal for giving weaker students more practice.

Grammar extension and **Vocabulary extension** worksheets offer more challenging practice for the more able students.

Reading and writing

There is a Reading and writing worksheet for every unit, providing more reading and writing practice linked to the topic and language of the unit.

Pairwork

There is one Pairwork worksheet per unit, giving oral practice of the grammar and vocabulary in the corresponding unit.

Puzzles and games

One page of puzzles is included for each unit, and two board games for each level of the series. Although these resources give practice of the main grammar and vocabulary of the unit, the emphasis is on fun activities, such as crosswords, wordsearches, and code breakers.

Video lessons

There are worksheets to accompany four video reports per level, and worksheets to accompany eight voxpop interview clips per level. The video clips are available on iTools and on the DVD. The worksheets are available online with all the other resources, on the DVD, and on iTools.

Tests and assessment

For each level of *Got it!*, there are eight Unit tests and four Review tests, all of which can be opened using Microsoft® Word and edited before printing.

The **Unit tests** include vocabulary and grammar questions, dialogue work, and a writing task. Each test is scored out of 50 points.

The **Review tests** focus on vocabulary and grammar, and reading, writing, and listening skills. Each test is scored out of 100 points.

All course tests have A and B versions, to help prevent your students from cheating.

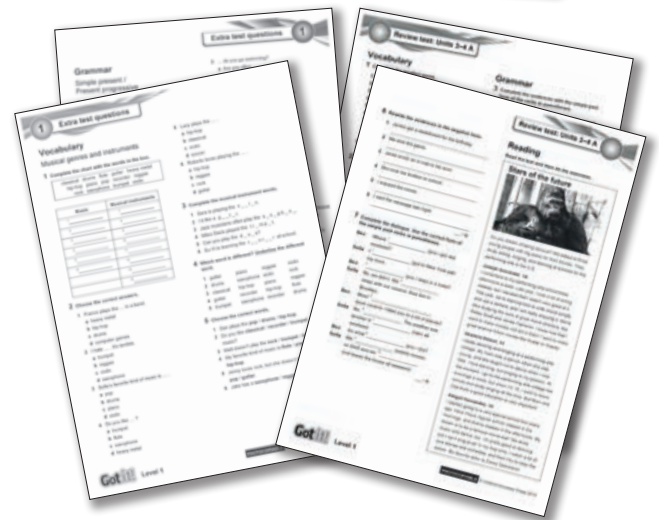

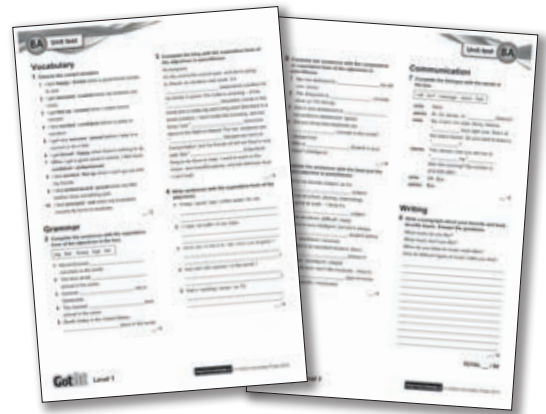

There is also a bank of **Extra test questions** in editable Microsoft® Word documents, with more grammar and vocabulary questions for every unit of the Student Book. You can use these to compile additional tests to suit your individual requirements.

Regular assessment makes it easier to monitor students' progress during each semester. Teachers can keep a record of individual students' progress using the evaluation chart on page xix.

There are also printable **practice examinations** in the style of KET, PET, and TOEFL Junior, aligned to the *Got it! 2nd edition* syllabus.

These will help students who are preparing for these exams to gain confidence with the specific question types while using language that they have already covered. The audio material for these practice examinations is available online with all the resources.

There is also a printable **KET practice test** with Level 2, and a printable **PET practice test** with Level 3. Further practice tests can be purchased from www.oxfordenglishtesting.com.

DVD

Two DVDs accompany the series, with four video reports for each level. The material deals with different cultural aspects of the English-speaking world, and is closely linked to the language syllabus and topical themes of the Student Book. There are also video voxpops – authentic interviews with American teenagers about the topics in the units of the book.

The video reports are designed to be used after completion of each Review unit, or after every second main unit.

The voxpops could be used at the end of each unit.

The DVD also contains printable worksheets, teaching notes, answer keys, and scripts. These can be accessed when the DVD is used with a computer.

In addition to the comprehension questions on the worksheets, there are multiple-choice questions displayed on screen after each documentary. The correct answer can be selected with the remote control if viewed on a DVD player, or using a mouse if viewed on a computer.

Class Audio CD

The Class Audio CD is for classroom use. There is a track list on page xxi.

Teacher's Book

The Teacher's Book contains detailed lesson notes and at-a-glance answers for all the Student Book and Workbook material.

Each Teacher's Book unit starts with a summary of the areas of vocabulary, grammar, communication, skills, and topical themes covered in the Student Book unit. Also listed are themes relating to values and responsible citizenship, such as:

- ethics and morals;
- society, including the themes of respect, solidarity, and justice;
- multiculturalism, including anthropology, human rights, cultural studies, sociology, and historical, geographical, legal, and ethical perspectives;
- the environment, including protecting the environment, and natural cycles;
- work and consumerism, including mass communication, advertising, sales, workers' rights, and consumer rights;
- health.

iTools

The *Got it! 2nd edition* iTools provides a powerful classroom resource for the teacher.

iTools contains the complete content of the Student Book and Workbook, designed to be projected in class. To take full advantage of its rich interactive content, it should be used with an interactive whiteboard, but may also be used with a computer connected to a screen or data projector.

In addition to the standard interactive functions common to interactive whiteboards, other features of iTools include:

- full audio content, launched directly from the Student Book page;
- audioscripts and answer keys displayed at the click of a button;
- interactive grammar presentations, which launch from the page, containing extra activities for each grammar point in the Student Book;
- video lessons with accompanying worksheets. There are four video reports per level, as well as authentic voxpop interviews with American teenagers for every unit. The video clips can be launched directly from the icon on the worksheet.

The notes include a description of the aim of every exercise in the Student Book, followed by detailed instructions and answers.

There are also suggestions for **Warm-up activities**, and **Extra activities** that can be used to extend the Student Book content according to the needs and abilities of each class.

The Student Book is full of factual information and references to the real world. The teaching notes provide support for this by giving additional notes and cultural facts in the **Background information** boxes.

Teenage students have an insatiable interest in music and popular culture, and the use of songs to consolidate the linguistic and topical contents of the Student Book can be an effective way of motivating students.

The teaching notes for each Review unit include suggestions for suitable songs that can be exploited for this purpose. The songs have been chosen because of their lexical, grammatical, or thematic link to the corresponding units.

See page xvi for suggestions on how to exploit songs in class.

Classroom management

An English-speaking environment

- Use English for classroom instructions as often as you can, and ask students to use English as well. For example: *Open your books at page 10. Raise your hand. Work in pairs, etc.*
- Students should be encouraged to use expressions such as: *How do you say ... in English? How do you spell ...? I don't understand. Please can you repeat that? Can you say that more slowly, please? Can I go to the bathroom?*

Managing large classes

Large classes are easier to manage if you establish routines such as:

- Write a plan of the day's activities on the board.
- Make sure that everyone understands the task before they start. Give clear examples and ask students to provide examples as well.
- Set time limits for all activities and remind them of time limits, for example: *You have two minutes left.*
- Walk around the class monitoring while students work.
- Get to know your students' personalities and learning styles so that you can maximize their potential in class.
- Allow stronger students to help weaker students while ensuring that there is always an atmosphere of mutual respect and understanding.

Group and pairwork

The interaction from working in small groups or in pairs is vital in a language classroom, and students quickly get used to what to expect. Here are some tips for organizing group work in large classes:

- Don't have more than five students per group.
- Set up group activities quickly by allocating students with a letter (A, B, C, etc.). Students form groups with other students who have the same letter.
- Demonstrate tasks with one pair or group at the front of the class.
- Set a time limit and keep reminding students of it.

Songs

There are many ways in which songs can be exploited in class, including the following suggestions:

- **Gap-fill** There are many variations of this type of activity, in which students are given the lyrics with certain key words deleted. To make it easier for students, the missing words can be grouped together in a wordpool. As students read the lyrics, they try to fill in the gaps, then they listen and check. If you wish to make the activity more challenging, you could add extra words to the wordpool as distracters, or not provide the missing words at all. It is important to choose the gapped words carefully, however, because they should be audible, and students should be able to guess from the context which word makes most sense in each gap.
- **Correct the mistakes** Include some incorrect words or information in the lyrics. Ask students to identify where the mistakes are and replace them with the correct words, before they listen to the song to check their answers.
- **Choose the correct alternative** At regular points in the lyrics, students have to choose between two or more alternative words or phrases to complete the lyrics correctly. Students then listen and check.

- **Put the verses in the correct order** This activity works especially well with songs that tell a story. Students are given the verses in the wrong order, and they have to guess the correct order before listening to the song.
- **Match rhyming words** Many songs are structured so that alternating lines end with rhyming words, and this provides an excellent opportunity to work on different sounds. One useful activity is to give students the lyrics with the lines of each verse jumbled. Students try to unjumble the lines, according to which lines rhyme with each other, before listening to the song to check their ideas. Another variation is for students to choose between two alternatives to end each line. This could mean choosing the word that provides the best rhyme, or the word that makes most sense in the context.
- **Match words to definitions** Songs often contain informal expressions, idioms, and colloquial grammar. With stronger groups, it can be useful to have students try to match difficult words and expressions to definitions or explanations. Alternatively, where lyrics feature more standard items of vocabulary, students could work together in groups to find the words in a dictionary and agree on a definition.

Feedback

It is important for students to have a sense of how they have performed. Provide feedback while you are monitoring activities. Alternatively, you can assess an exercise afterward with the whole class: students can put up their hands to indicate how many answers they shared, how hard or easy the task was, etc. Encourage students to behave well by using a points system. Award points to pairs or groups that don't make too much noise. Deduct points from pairs or groups that are too noisy or who are not speaking in English.

Common European Framework of Reference (CEFR)

The Common European Framework of Reference (CEFR) was designed to promote a consistent interpretation of foreign-language competence among the member states of the European Union. Today, the use of the CEFR has expanded beyond the boundaries of Europe, and it is used in other regions of the world, including Latin America, Asia, and the Middle East.

The CEFR defines linguistic competence in three levels: A, B, and C. Each of these levels is split into two sub-levels:

A	Basic User	A1	Breakthrough
		A2	Waystage
B	Independent User	B1	Threshold
		B2	Vantage
C	Proficient User	C1	Effectiveness
		C2	Mastery

The CEFR provides teachers with a structure for assessing their students' progress as well as monitoring specific language objectives and achievements. Students respond to the CEFR statements in the Reviews after Units 2, 4, 6, and 8.

Got it! aims to enable students to move from no English or level A1 into level B2 at the end of the four years of the course.

Descriptions of the CEFR levels

Basic User

- A1** Can understand and use familiar everyday expressions and very basic phrases aimed at the satisfaction of needs of a concrete type. Can introduce himself / herself and others and can ask and answer questions about personal details such as where he / she lives, people he / she knows, and things he / she has. Can interact in a simple way provided the other person talks slowly and clearly and is prepared to help.
- A2** Can understand sentences and frequently used expressions related to areas of most immediate relevance (e.g., very basic personal and family information, shopping, geography, employment). Can communicate in simple and routine tasks requiring a simple and direct exchange of information on familiar and routine matters. Can describe in simple terms aspect of his / her background, immediate environment, and matters in areas of immediate need.

Independent User

- B1** Can understand the main points of clear standard input on familiar matters regularly encountered in work, school, leisure, etc. Can deal with most situations likely to arise whilst traveling in an area where the language is spoken. Can produce simple connected text on topics which are familiar or of personal interest. Can describe experiences and events, dreams, hopes, and ambitions, and briefly give reasons and explanations for opinions and plans.
- B2** Can understand the main ideas of complex text on both concrete and abstract topics, including technical discussions in his / her field of specialization. Can interact with a degree of fluency and spontaneity that makes regular interaction with native speakers quite possible without strain for either party. Can produce clear, detailed text on a wide range of subjects and explain a viewpoint on a topical issue giving the advantages and disadvantages of various options.

English Portfolio

The **Language Portfolio** has been developed in conjunction with the CEFR. It is a folder kept by the students which details their experiences of English and learning English. A Language Portfolio consists of the following elements:

A Language Biography

- A checklist for students to assess their own language skills in terms of "What I can do." In *Got it!*, these are found in the Review Units after Units 2, 4, 6, and 8.
- Tools to help students identify their learning style and objectives. See the photocopiable form for students on page xviii.
- A checklist of learning activities outside the classroom. See the photocopiable form for students on page xviii.

A Language Passport

- An overview of the level attained by the student in English at the end of the year.

A Dossier

- Samples of the students' work, including tests, written work, projects, or other student-generated materials. In order to assist students with the compilation of a Language Portfolio, you may ask them to record their answers to the CEFR checklist on a separate sheet of paper and keep it in a folder. In addition, provide each student with a copy of the photocopiable form from page xix once they have completed the CEFR checklist in the book. Ask them to keep these forms in their portfolio folder as well. Finally, encourage students to choose several pieces of their work from different points in the year in order to compile the dossier that will appear in their portfolio.

- Ask: *What do you think life was like for black people in the U.S. at that time?*

Background notes

- Alabama is a state in the southeast of the United States, and has always been one of the poorest and most conservative states. In the 1950s, bus companies had the policy of reserving the front rows of seats for white people. If more white people got on the bus, and there were no free seats, it was expected that black people would move further towards the back of the bus, or stand.
- Rosa Parks (1913–2005) is now celebrated in the U.S. as the “first lady of civil rights.” In her autobiography she says that she refused to move that day because she was “tired of giving in.”

A Culture club

Rosa Parks

To most people around her, Rosa Parks was an ordinary woman with an ordinary life in Montgomery, Alabama in the U.S. With her slim figure, black hair and brown eyes, she looked like a typical African American woman in the 1950s. But Rosa Parks was not ordinary. Life for African American people was very difficult in those years, and Rosa was one solution to their problems.

In 1950s America, black people’s lives were very different from those of white people. Their jobs were bad, and their schools were terrible. Everything for white people was better. But Rosa’s actions on one evening in 1955 were very important for change.

Imagine you are a black person sitting on a bus. The bus is full, and a white person climbs on. The bus driver says to you, “Stand up and give this person your seat.” What do you do?

Rosa’s decision was to stay in her seat. The bus driver was very angry, and Rosa was in trouble with the police. But the incident was soon very famous all over America. And with support from other black people in her community, there was a boycott of the bus company, too – for over a year! Now it was clear to all Americans that black people were not happy with their lives. After a change in the law in 1956, there were more equal rights for black people in the U.S. Rosa Parks’ story shows that one person’s simple action can make a great difference for millions of people.

3 Skills

The Discovery of Antarctica

Antarctica is an enormous frozen continent at the South Pole. It's very cold and windy, and there's snow and ice all year. In the 1890s, many explorers went to Antarctica, including the British explorer Ernest Shackleton, Roald Amundsen from Norway, and Nobu Shirase from Japan. Another very famous name in Antarctic history is British explorer, Captain Robert Scott.

Scott's first expedition began in 1901, but there was terrible weather, with strong winds and freezing temperatures. Scott and his men stopped their expedition before they reached the South Pole.

Between 1910 and 1912, the Japanese explorer Nobu Shirase and his men went on an expedition in Antarctica. They explored the Edward VII peninsula, but they didn't reach the South Pole.

Scott started his second expedition to the South Pole in 1910, too. There was a race between him and Roald Amundsen to reach the South Pole first. Scott and his men arrived there on January 17th 1912, but they found a Norwegian flag and a message from Amundsen. The Norwegian explorer and his men arrived at the South Pole 33 days before Scott.

Scott and his men started traveling back to camp. Again, the weather was terrible with strong winds and snow. His men were freezing and hungry, and, tragically, everyone died. They were only 18 km from their base camp.

There were many Antarctic explorers, but people admire Captain Scott for his courage and determination. He wasn't the winner of the race to the South Pole, but he helped people to understand the extreme weather, geography, and geology of Antarctica.

Liam began his acting career when he was 16. Aged 19, he auditioned for a part in the movie *Thor*, but didn't get it. But this didn't stop Liam, and eventually he started winning movie roles in Hollywood. In 2011, he won the part of Gale Hawthorne in the popular *The Hunger Games* movies. He acted opposite Jennifer Lawrence. She played Gale's best friend Katniss. In 2010, *Details* magazine chose him as one of "The Next Generation of Hollywood's Leading Men." *We Love Movies* agrees!

WITCHES & WIZARDS

↑ Twelve-year-old Amy Branning is very excited. Today, she visited the Harry Potter theme park in Orlando, Florida. Amy loves the Harry Potter books and movies. But how did they all begin?

Author J.K. Rowling had the idea for Harry Potter on a train journey. But she didn't have a pen! When she got home, she started her first Harry Potter book, *Harry Potter and the Philosopher's Stone*. Five years later, in 1995, she sent the book to a lot of publishers, but they didn't like it! Finally she got a "yes" from a publisher, and in 1997, the first Harry Potter book was in bookstores. Soon it was a bestseller in the U.K., the U.S., and around the world, too. Six other Harry Potter books followed, and they became bestsellers, too.

In 2001, the first book became a movie. The movie director needed an actor for the part of Harry. In London, Daniel Radcliffe's parents heard about the movie, but they didn't tell Daniel! He was only 11 years old, and the location for the movie was Los Angeles. But the director thought Daniel was perfect for the part of Harry! He changed the location from Los Angeles to London, and Daniel got the part of Harry!

The Harry Potter movies were very successful, but Harry Potter fans wanted more! In 2011, J.K. Rowling created a website, *Pottermore*. Visitors can learn to make magic spells and play interactive games.

Today, there are Harry Potter theme parks in the U.S. and Japan. Visitors watch shows, and go on rides inspired by Harry Potter. In London, fans can visit the Harry Potter movie studio. They see the movie sets and learn secrets about the special effects in the movies.

So, what's next for Amy? "I'm a very big Harry Potter fan!" she says. "Maybe I can go to the studios in London next year!"

A history of school lunches in the U.S.

1930s

At this time, a lot of people didn't have jobs. They didn't have much money to give their children a lot of food. A school lunch became very important for this reason, and children got at least one hot meal every day.

1940s-1950s

The National School Lunch Program began. At school, children now ate meat with two vegetables and pieces of fruit every day. They also received some bread and butter. From 1954, children also got one big cup of milk every day.

1970s

Vending machines appeared in schools. Now it was possible for children to buy soda, candy, and potato chips during school hours. Not surprisingly, not many children wanted their school lunches!

1980s

School lunches were in trouble! The government gave less money for school lunches, and fresh food became very expensive for schools. Food portions became very small. Schools started selling pizzas and burgers from private companies. These foods are full of salt and fat, and are very unhealthy.

2000s

Things are getting better! Vending machines are disappearing from schools, and some farms now sell fresh fruit and vegetables directly to schools. With less sugar, salt, and fat in school lunches, there is more fresh, healthy food for everyone!

When you see an expression for the first time, think about different situations you can use it in. This helps you to memorize the new language.

Learn it, use it!

You ask	You answer

Skills

A very long bus ride

When Canadian student Andy Fitzpatrick left school last summer, he decided to travel to Australia. He traveled in a group from London to Sydney ... on a bus! Here are some extracts from his blog.

Week 1
We left London yesterday, and today, we're in Bruges in Belgium. Tomorrow, we're traveling to Heidelberg in Germany. The bus is very comfortable, and the other passengers are very friendly.

Week 2
A few days ago, I was in Prague in the Czech Republic. It was so beautiful! Now we're in Istanbul in Turkey, a city in both Europe and Asia! There are just two problems: 1) Ron, a student from Liverpool—he thinks he's a travel expert, but I think he's a loser! And 2) we have a different bus. It's very small!

Week 4
A new and better bus took us around Turkey, and we traveled down the coast in a boat, too. Then, we took an airplane to India. Now, we're in Delhi. It's an exciting city, but there's a lot of poverty here. Next week, we're going to Nepal.

Week 9
We visited some awesome cities: Kathmandu in Nepal, Bangkok in Thailand, and Kuala Lumpur in Malaysia. We nearly lost Ron in all of them! Now, after a very scary boat trip, we're on the island of Bali in Indonesia. I'm relaxing on the beach! We're flying to Darwin in Australia soon. I don't want to leave Asia. It's an amazing continent.

Week 13
After thirteen weeks, we're in Sydney! I'm walking a lot and exploring the city. Luckily Ron has a girlfriend, so he doesn't talk to me now! Tomorrow, I'm traveling back to London ... but I'm taking an airplane this time!

Check it out!

Junior MasterChef

Can you cook? Do your family and friends think your food is amazing? How about entering a cooking competition? There are a lot of TV cooking competitions for children these days, and they are becoming very popular.

In Australia, the cooking competition *Junior MasterChef* first appeared on TV screens in 2010. About 5,000 children entered! The show was very popular and attracted a lot of children in 2011, too. But the level of the competition was very high, and there were 50 children in the second series.

The children did a lot of different things in the 21 episodes. In one episode, they invented their own meals with two key ingredients, and in another they worked in a high school snack store for a day. They also discovered how to use ingredients like fresh herbs in their cooking, and learned how to prepare some very complicated meals.

The winner of the second series was 11-year-old Greta Yaxley. She entered the show without any hopes of winning – she simply enjoyed cooking. But each week, her excellent meals won a lot of points, and it didn't take long for the judges to see her special talent.

In the final episode of the series, Greta's first test was to prepare a dessert with only a little time. There were a few mistakes, but the result was delicious. Her second test, a seafood dish, also had a few problems, but at the end the judges thought it tasted great.

Greta's prize was AU\$15,000. There was a lot of praise from the judges, too. She was very surprised and very happy. "I want to continue with food," she said. "I want to show the whole world that I love food, and that I can cook it."

7 Skills

OUR CHANGING PLANET

Our planet is getting warmer. We know it changes our weather, but it changes the geography of our planet, too.

BEACHES ARE GETTING SMALLER!

When water gets warmer, it expands. And when the ice at the North and South Poles gets warmer, it melts. As a result our seas and oceans are getting bigger, and some islands are losing their beaches! The beautiful beaches of Hawaii are very popular with tourists, but they are growing smaller each year. The government is spending millions of dollars to make beaches bigger with sand from beneath the sea. But the problem is very serious.

MOUNTAINS ARE GROWING TALLER!

The surface of the Earth has two parts: the soft mantle, and the hard crust around it. The crust looks like a jigsaw puzzle, and the pieces are always colliding. They push land up, and mountains appear and grow taller. And this happens again and again! But scientists also think that with less heavy snow and ice on the mountains, it's easier for them to grow! In Patagonia, the mountains increased in height by 3.9 cm between 2003 and 2006.

VOLCANOES CAN BECOME MORE ACTIVE!

Warmer temperatures can make volcanoes on dry land more active. Melting snow and ice adds water to the oceans, and they become deeper and heavier. There is greater pressure on the ocean floor, and less pressure on dry land. This makes it easier for volcanoes to erupt. Volcanic eruptions make countries and islands larger. One example is Big Island in Hawaii. Its volcano Kilauea is very active, and its lava is forming new land. Hawaii's beaches are shrinking ..., but its land is getting bigger!

My reading skills

There are different ways you can find the meaning of new vocabulary without a dictionary.

- Decide what part of speech it is – a verb, noun, adjective, etc.
- Look for cognates – they are similar to words in your language.
- Use the context of a text to help you understand.

Reading

1 Read the skills box. Then find the words in the article. Write the meanings in your language.

1 parts of speech: serious _____	increase _____
2 cognates: expand _____	pressure _____
3 context: beneath _____	shrinking _____

2 **2:21** Read and listen to the article. Then answer the questions.

What do warmer temperatures change?
They change our weather and the geography of our planet.

- 1 What is happening to beaches in Hawaii?
- 2 Where does the extra sand come from?
- 3 What is the Earth's surface made of?
- 4 What causes mountains to grow taller?
- 5 How much did the mountains in Patagonia grow in three years?
- 6 When do oceans become deeper and heavier?
- 7 What does this do to the ocean floor?
- 8 Why is Big Island getting bigger?

78 seventy-eight

Extra activity

- Point out that there are three topics in the article (beaches getting smaller, mountains growing taller, and volcanoes becoming more active).
- Tell students they are going to choose one topic to explain to a partner.
- Ask students to read about the topic they have chosen very carefully and note down key words, then ask them to close their books.
- Students work in pairs to try to explain the topic they chose to a partner. Their partner can ask questions if they don't understand.
- Students can then check in the article to see if they remembered everything.
- Ask some students to explain their topic to the class.

Your Reports

THE ‘-EST’ MOMENT OF YOUR LIFE!

Tell us about the ‘-est’ moment of your life. Was it the best? The funniest? The proudest? We want to know!

Ana

Last year, a note turned up in my bag. It said, “Do you want to go on a date?” and had a cell phone number at the bottom. It was from Pablo, a boy in my class. I was very excited because I thought he was the coolest boy in school! I called the number but, guess what? Pablo didn't know about the note. His friends played a joke on me – it was the worst day of my life and I was so embarrassed. Now Pablo always ignores me. I'm still embarrassed, and my friends and I think he and his friends are idiots!

Naomi

elevator.jpg attached

My scariest moment was in an elevator – I needed to go to the twentieth floor. It was just me and a man I didn't know in there, and suddenly the elevator stopped and the lights went out. I was really frightened, and I started screaming and shouting. We got out after about twenty minutes. That poor guy – I don't know what was scarier for him – the problem with the elevator, or me!

David

party.jpg attached

My younger brother, João, has problems with his legs. Last year, he started elementary school. I felt nervous for him, and I was very annoyed when the other kids asked why he wasn't as fast as they were. But João just laughed – he didn't care, and his first day turned out fine. Now he's very popular and on his seventh birthday, all the class came to his party. That was the proudest day of my life.

2 I'm worried because I've lost my cell phone. I hope it turns up / turns out soon.
3 I was worried about the weather. But it went out / turned out OK in the end.

2 2-28 Read and listen to the website. Then write *João*, *Naomi*, or *Pablo* next to the sentences.
1 Who is the least worried about his situation? João
2 Who was in the darkest location? Naomi
3 Who is less popular than before? Pablo

3 Answer the questions.
Where did Pablo's friends put the note? They put it in Ana's bag.
1 How did Ana feel when she discovered the joke? She felt embarrassed.
2 How did Ana's opinion of Pablo change? She thought he was the coolest boy in school, but now she thinks he is an idiot.
3 Who was in the elevator with Naomi? João.
4 What was it like in the elevator when it stopped? It was dark and scary.
5 How long were they in the elevator together? About twenty minutes.
6 Who was David worried about? His younger brother, João.

5 A food article

1 Read the rules for using apostrophes.

Using apostrophes

- We use apostrophes to show possession or relationships.
The apostrophe goes before the possessive s if the person or thing is singular, and after the possessive s if it is plural.
Carmen's house. The two boys' parents.
- We also use apostrophes for short forms.
I don't have my bag. We're waiting for you!
- We don't use apostrophes ...
 - to show plurals, e.g., *I have two pencils.*
 - in possessive pronouns, e.g., *hers.*
 - in the possessive adjective *its*, e.g., *The cat broke its leg.*

2 Look at the words with apostrophes in bold. Write P (possessive) or SF (short form) next to each sentence.

- Lucy's** parents eat a lot of meat. **P**
- Mario's** having a birthday party tomorrow. **SF**
- Who's** cooking dinner? **SF**
- The **teacher's** ruler is on the table. **P**

3 Circle the correct answers.

- Mom's** / **Moms** leaving **her's** / **hers** on the table.
- You're** / **Your** with **you're** / **your** friends.
- The dog wants **it's** / **its** dinner because **it's** / **its** very hungry.
- They're** / **Theyre** my **dad's** / **dads** new car's / **cars**.

4 Read the text. Add apostrophes in the correct places.

The history of the hamburger
The hamburger is one of America's favorite foods, but there's a lot of discussion about its origins. The round piece of meat probably first appeared in Germany in the 19th century. But it wasn't till 1904 that an American restaurant owner decided to sell it between two pieces of bread. That man's name was Louis Lassen and he was possibly the first person to make the famous hamburger we know today. The hamburgers ingredients are usually beef, eggs and onions. Theyre delicious!

1 Read the rules for ordering events.

Ordering events

- We use adverbs to order events. This helps the reader to understand the text because it has a clear structure. We can use words like *first, next, then, after, after that, lastly, and finally*.
- We can also separate events with commas and *and*.
First we visited the museum, then we had lunch in a restaurant, and lastly we went for a walk along the river.

2 Choose the correct answers.

After / **Next** the concert, I'm going to a party and **finally** / **first** we're going home about midnight.

- Finally** / **First** we're flying to Miami and **first** / **then** we're traveling to Tampa.
- Jorge is going to Spain next week. **First** / **Then** he's staying in Madrid, and **finally** / **first**, he's traveling south to Malaga.

3 Order the events with adverbs, commas, and and. More than one answer is possible.

I went to school. I played sports. I did my homework. I watched TV. I went to bed.
First I went to school, then I played sports, next I did my homework, and lastly I went to bed.

- We have breakfast at eight o'clock. We have a snack at about eleven o'clock. Lunch is usually at one o'clock and we eat dinner at about seven o'clock. We have another snack at about ten o'clock.
- I'm flying to Berlin. I'm spending a day in Weimar. I'm taking a train to Trier. I'm visiting some friends in Bonn. I'm flying home.

4 Put the events in the correct order. Then add adverbs to each sentence to order the events. Sometimes more than one answer is possible.

- He's arriving in New York late at night. **1**
- He's spending his last day at Ellis Island and the Statue of Liberty. **5**
- He's going to the tourist office for a map. **3**

7 A story

1 Read the rules for using *also* and *too*.

also and too

Also and *too* have the same meaning. We use the words to link two similar or related points. However, they go in different parts of a sentence.

- a *Also* usually goes after the verb *be* or before other verbs.
I *also* thought the movie was scary.
But it *was also* pretty funny.
- b *Too* usually goes at the end of a sentence, after a comma.
I thought the movie was scary, *too*.

2 Reorder the words to complete the sentences. Sometimes more than one answer is possible.

are / but / dangerous / are / beautiful, / also / they
Volcanoes are beautiful, but they are also dangerous

1 to climb / Iceland / like / , too / I'd / like / to visit / , and / its mountains
I'd like to visit Iceland, and I'd like to climb its mountains, too

2 are / getting / also / are / they / and / getting / warmer, / deeper

4 Now do exercise 6 on page 79.

8 A report

1 Read the rules for using *however* and *although*.

however and although

We use *however* and *although* to compare and contrast two points.

- a *However* often goes at the beginning of a sentence or paragraph.
It was a beautiful, sunny day. *However*, Nuria looked very sad.
- b We always put a comma after *however*.
It was a beautiful, sunny day. *However*, Nuria looked very sad.
- c We usually use *although* in one sentence with two contrasting points. *Although* can go at the beginning of the sentence, or between the two points.
Although it's colder than yesterday, it's sunny.
Eva never seems tired, *although* she always goes to bed late.

2 Choose the correct answers.

However / Although it's a hot day, it's very cloudy.

The Suzuki Method

1 **A** We sometimes see video clips of young children playing instruments. The children are so small that their violins, pianos, and other instruments appear enormous next to them, but they play like expert musicians. Their little fingers move rapidly, and their bodies move in time to the music. But how can these very young children play so well? They are learning with the Suzuki method.

10 **B** The Suzuki method of learning musical instruments comes from Japan, and was the idea of a man called Shinichi Suzuki (1898–1998), a violin teacher from Nagoya. His belief was that all children can play musical instruments well. He also believed that children can learn to play a musical instrument in the same way that they learn to speak a language.

15 **C** As babies, we learn a new word when we hear it hundreds of times. With the Suzuki method, children learn a new piece of music through listening.

20 **D** We learn to talk first, and then to read. In the same way, the Suzuki method teaches children to play their instrument, and then to read music.

25 **E** We learn from our parents and teachers, and from other children, too. For this reason, children have individual music lessons, but also learn in groups with other children. In groups, children can motivate and encourage each other.

30 **F** Shinichi Suzuki also believed it is better when children learn their instrument from a very young age. Therefore with the Suzuki method, there are a lot of music students as young as three or four.

35 **G** Some people don't like the Suzuki method. They think it creates robots, not musicians because the children are only repeating what they hear. Others believe it can only work with ambitious parents who make their children work very hard.

40 **H** There are different opinions, but it is difficult not to admire these children. For this reason the Suzuki method is now popular all over the world.

Why We Have Seasons

1 When you look at Planet Earth's journey around the sun, you can see that our planet isn't straight. It's tilted, at 23.5 degrees. Scientists aren't completely sure why it is like this. But some believe that about 4.5 billion years ago, a collision with an enormous object, like an asteroid, pushed Earth into a new position. As a result our planet was tilted, and the collision created our seasons, too.

The Earth's journey around the sun takes one year. For six months of the year, the North Pole tilts towards the sun. Therefore, the top part of our planet, or northern hemisphere, experiences summer time. At the same time, the South Pole tilts away from the sun, and the southern hemisphere is in winter time. For the other six months of the year, the South Pole tilts towards the sun, the North Pole tilts away, and the seasons reverse. So, maybe it's snowing on Christmas Day in Canada, but in Uruguay people are celebrating in hot, sunny weather!

25 The middle of Planet Earth, the equator, is always near the sun and countries in this region, such as Brazil, Colombia, and Northern Australia have tropical weather. Temperatures there are usually warm, above eighteen degrees, and there are no seasons. But it gets very rainy, too. That's why the equator has a lot of rainforests. Constant, hot, wet weather is a perfect place for them.

Nevertheless, seasons are very important for animal and plant life. Imagine our planet without its tilt, and without the seasons. In this situation, near the North and South Poles it's always dark and freezing, so plants and animals in those regions can't survive. Most plants and animals live near the equator because it's warm and sunny there, but this is bad for essential plants like wheat, corn, and potatoes. These plants also need cold winter weather to grow well. The result is that we have great weather, but we don't have sufficient food. How can we live on our planet like this?

The collision 4.5 billion years ago created the seasons, with their temperature variations and beautiful changes of color. But most importantly, it created enormous possibilities for life on our planet.

A HISTORY OF AIR TRAVEL

1485

1 In about 1485, Leonardo da Vinci began studying birds and how they fly. He drew a series of detailed pictures of flying machines. One, called the *ornithopter*, copied the movement of birds' wings.

1903

5 On December 17th 1903, Orville Wright flew 36 meters in an airplane. It was probably the first flight in a flying machine to stay in the air under the control of a pilot, and lasted twelve seconds!

1914

10 At the beginning of the First World War (1914–1918), airplanes were very simple. Pilots only used them to follow the movements of enemy soldiers. But at the end of the war, they were pretty sophisticated and pilots used them to fight the enemy.

1937

15 Amelia Earhart was the first woman to fly alone across the Atlantic Ocean. In 1937, she tried to fly around the world. Sadly, on July 2nd, her airplane disappeared over the Pacific Ocean. Today, we still don't know the location of Amelia's airplane, or her body.

1957

20 In 1957, the Russians completed the first successful flights into space. In the same year, a dog called Laika became the first animal in space. The first astronaut traveled into space in 1961.

1976

25 In 1976, Concorde airplanes became the world's first supersonic commercial airplanes to carry passengers. But the Concorde planes were very expensive because they used a lot of fuel. The last Concorde flight was in 2003.

2005

30 In 2005, the world's largest passenger airplane appeared in the skies. The Airbus A380 can fly over 15,000 km without stopping, and can carry 555 passengers! People ask why an enormous airplane is a good idea. Its designers say it only uses a little fuel for its size, and doesn't make much noise.

2014

35 In January 2014, the Virgin Galactic SpaceShipTwo completed its third test flight and reached more than 21 km above the Earth. It prepared to carry a group of tourists above the Earth's atmosphere for a two-and-a-half-hour journey. But this trip is very expensive – tickets cost about \$250,000!

40 This timeline shows the enormous changes in air travel in 100 years. And it is still changing very fast! Where are we going next? The future is very exciting!

D Curriculum extra Citizenship

The Rules of Behavior in Different Countries

- 1 Every country is proud of its rules of polite and acceptable behavior. However, they are different in each country. In the U.S., for example, there are some forms of behavior that Americans think are polite. But in South Korea, these forms are rude and can make local people embarrassed. And there are South Korean customs that are difficult for Americans to understand!

BODY LANGUAGE

Some countries are more relaxed in their body language than others.

- 10 In South American countries in general, people stand closer to each other than in English-speaking countries. Some parts of the body can offend people, too. In Asia, 15 people think the feet are the dirtiest part of the body, so showing the soles of your feet can make people very angry. There are different rules about blowing your nose: never 20 blow it in Japan, where people think it's absolutely disgusting!

GREETINGS

- 30 First impressions are important wherever you go, so it's important to greet a new person in the correct way. In the U.S., people generally 35 appear more relaxed and confident than in other countries, and it's normal to tell a new person your name. However, in Korea, people 40 always wait until another person does this for them. In many parts of Europe, people offer their hand to greet someone for the first time, but 45 in Asian countries, people bow.

TABLE MANNERS

When you are visiting another country, it is important to try to eat in the same way as local people. In some parts of India and Africa, people eat whole meals with their hand. In 25 the U.S., it's normal to eat some things (but not everything!) with your hands, and across the ocean in the U.K. the same is true. In South Korea, it is polite to eat all the food on your plate at a dinner party. But in China, an empty plate indicates that your host didn't give you sufficient food!

A GENERAL RULE

For people who are traveling to another country, it's a good idea to learn a few of the local rules of behavior. But most people 50 understand when a visitor makes a cultural mistake. And there is always one thing people can do which helps in all situations: smile!

Good morning, listeners. Today, we're remembering the world-famous explorer, Sir Edmund Hillary, who died yesterday. Sir Edmund was born in New Zealand in 1919. At school, he was an intelligent pupil, and completed elementary school two years early. Then, in 1935, aged 16, he discovered his love of climbing on a school trip to the mountains, and completed his first big climb in 1939. He traveled to Nepal to climb in the Himalayan mountains for the first time in 1951. And on a windy May morning in 1953, he became the first person in history to reach the top of Mount Everest. But other things were very important for Sir Edmund, too. After he arrived at the South Pole in 1958, he wanted to help the people of Nepal. In 1962, he began to work there, and helped to build schools and hospitals. It's a sad day for climbing, but Sir Edmund leaves behind him some amazing work and discoveries. Sir Edmund Hillary died yesterday, on Saturday, January 11th, 2008 in New Zealand.

Host Aah, yes. I often do that with potato chips ... I feel terrible afterwards!

Michelle One more thing ...

Radio host On May 18th, 1980, the volcano Mount St. Helens erupted. Mount St. Helens is in the United States and its eruption was bigger than any other in U.S. history. Fifty-seven people died, and the disaster destroyed huge areas of land. Today, I'm with Edie Matthews, who was 14 on that day. Edie, what do you remember?

Edie It was a Sunday morning, and everything was quieter than usual. Usually, there were a lot of birds and other animals in my garden, but there was absolute silence. Then I noticed that the sky was darker, too.

Radio host Did you know immediately what the problem was?

Edie No, I didn't because we lived about 240 km from the volcano. My uncle called and told us about the eruption. He lived nearer to the volcano than us, but luckily he wasn't in any danger.

Radio host Were you scared?

Edie I think I was more surprised than scared. We knew that the volcano was ready to erupt. But we didn't really expect a big eruption. However it wasn't only a little lava, it was an enormous explosion!

Radio host What did you do?

Edie We went to our grandmother's house. During the day, the sky got darker. The air became hotter and started to smell worse, too. However, the photos of the black land around the volcano look worse than any of my memories. They're a reminder of the people and animals who lost their lives.

Interviewer According to a survey, Australia is the happiest country in the world. I'm with Jodie Matthews, from Sydney. Jodie, were you surprised with the results?

Jodie No, not at all!

Interviewer Why's that?

Jodie Well, a lot of Australians have a very active outdoor lifestyle. I think that being active makes you healthier. And I think it makes you a happier, more confident person, too.

Interviewer Well, health is one part of the survey and I see that Australians are on average healthier and often have longer lives than people in other countries. But there are other things, too, aren't there?

Jodie That's right. Our jobs pay us good money – that makes us richer, and we have less unemployment than in other countries.

Interviewer You aren't the richest people, though. In Norway and the U.S., people have more money. So why do you think Australia won?

Jodie I think we are happier because of our fantastic weather. That's more important than money!

Interviewer The report also says that Australians have a lot of positive feelings. They often feel happy, proud, and enjoy what they're doing. Do you think that's true?

Jodie Definitely. I think Australians are happy people. We enjoy our lives. And most important of all – we're proud of our country!

Andres I'm just thinking about our vacation in Wales last summer, Bella. It was awesome!

Bella What are you talking about, Andres? It was the worst time of my life!

Andres You're kidding! I thought it was the best vacation ever. Remember that beautiful beach? I was so happy that day.

Bella But it rained! In fact, it rained every day we were there. I think Wales has the wettest weather in the world. I got so fed up.

Andres Remember all those beautiful walks we did?

Bella You, Mom, and Dad love walking. I don't! I'm not as active as you.

Andres But what about that mountain? It was the highest mountain in Wales! When I reached the top, I felt really proud.

Bella I don't care how high it was. It was so cold and windy up there I got really frightened.

Andres Oh, you're always worried about things.

Bella I'm not like you. You're more confident than me.

Andres Well, Bella, do you know what the best thing about the vacation was?

Bella No. What?

Andres Mom and Dad had such a great time, we're going to Wales again next year!

Bella No way!
